

Qwiklabs Assessment: Working with Regular Expressions

 coursera.org/learn/python-operating-system/gradedLti/JT8nU/qwiklabs-assessment-working-with-regular-expressions

Introduction

It's time to put your new skills to the test! In this lab, you'll have to find the users using an old email domain in a big list using regular expressions.

What you'll do

- Replacing the old domain name (abc.edu) with a new domain name (xyz.edu).
- Storing all domain names, including the updated ones, in a new file.

You'll have 90 minutes to complete this lab.
